# Mutual Aid Farms

"Soil is not just a substance, soil is the soul."  
— Amit Kalantri, Wealth of Words

# What is a Mutual Aid Garden?

**Mutual Aid:** A structured volunteer organization with the idea that all volunteers contribute to a cause or mission. Mutual Aid is fairly common by itself without a formal organization behind it. We all have something to offer and ways to support each other.

**Examples:** Borrowing a cup of sugar. Sharing recipes. Teaching a neighbor how to fix something. Ect.

**Mutual Aid Garden:** With a Mutual Aid Garden, all contributing members are pulling together to grow food and can all benefit from that food. Think of this as a give-and-take garden. You give your time and/or your materials and you then can take home some of the crops you helped contribute to.

**Why is this beneficial?:** Not everyone has everything they need to grow crops successfully, but communities can pull together their resources to accomplish shared goals. Building good repour with your community members, strengthening the bonds between people.

# Examples of a Mutual Aid Garden

Opirg Kingston

"We don't rely on those in power to fix things for us - we come together and take direct action. We share space, harvests, and learn new skills together."

"Eliminating hunger and food waste in Southcentral Alaska through story sharing and community collaborations"

## GARBAGE HILL FARM

"... Garbage Hill Farm planted a publicly accessible mutual aid garden on the north side of the property. This self-harvest garden can be accessed annually throughout the Chicago summer growing season."

## Yarducopia

"We pair homeowners who donate yard space and tools with volunteers who want to learn organic gardening techniques. The produce grown is split between homeowner and volunteers, saving ten percent to be given to a charity of their choice. "

# Ways to Start a Mutual Aid Garden

At little to no cost

## To Get Growing Space:

Neighbors offer space for community members to grow or Section off their outdoor garden to grow food for the community

Utilize your balcony

Credit: Garbage Hill Farm

Portion off a section of your balcony to grow foods to donate to your community fridge

## To Get Tools :

- Recycling center – 5 gallon buckets
- Midtown Garden– free gardening supplies
  - via Yarcucopia
  - FB Buy Nothing Groups

## To Get The Word Out :

Create a presence in the community

Via

- Website
- Instagram
- Facebook

## To Get Other Needs :

Specifically for Lasagna beds:

Cardboard– REI, Costco, Dumpster Diving

Neighbors taking care of neighbors in the face of COVID-19

"Sitka Mutual Aid primarily serve people experiencing food insecurity, those with financial need, people in quarantine, people in self-isolation, and people at high-risk for COVID-19."

Notes

# Community Gardens

"There's nothing like eating food you've grown yourself."  
— A.D. Aliwat, In Limbo

# What is a Community Garden?

**Community Garden:** A space in a community where individuals and their families can rent space to grow to produce. Typically there is a lot of land that has evenly divided growing spaces.

**Methods:** Often raised beds but you can make some with in-ground beds.

**Why is this beneficial?:** Especially in urban settings where land to grow on is hard to come by (think of people living in apartments for example). This also has people growing closely together and provides opportunities to exchange knowledge and get to know your community members better.

This is an essential part of our state's Food Sovereignty solution.

The more that the communities begin supplying means to individuals and/or their families for the growth of their food, the better for the wealth and health of that community.

# Farm-to-Table

"Without the farmer, there is no food."  
— Lailah Gifty Akita

# What is Farm-to-Table?

**Farm-to-table:** also known as farm to fork, can be defined as a social movement where restaurants source their ingredients from local farms, usually through direct acquisition from a farmer. Most traditional restaurants get their produce from other parts of the country or around the world.

**Why is it Beneficial?** Farm-to-table food is healthier than processed and packaged foods. Many of the ingredients and products are locally grown or raised. Pre-packaged food you buy at the store more calories, fat, sugar, and carbohydrates than foods grown at your local farm.

When you dine out at a farm-to-table restaurant, you're helping the environment, too. Because local food is transported just small distances, less fuel is consumed and less emissions are released in the process of getting the ingredients to the restaurant.

Notes

# Market Gardens

"A farmer is a magician who produces money from the mud."  
— Amit Kalantri, Wealth of Words

# What is a Market Garden?

**Market Garden:** A smaller scale farm that works efficiently to sell crops directly to consumers or restaurants. They are for-profit farms.

**Crops Grown:** Fruits, vegetables, flowers, and cash crops.

**Size of Operation:** Generally between 1 to 3 acres.

**Techniques Practiced:** Monoculture, mechanization, manual labor, gardening techniques.

**Fun Tidbit;** Many people who get into Market Gardens develop a whole lifestyle around the business.

# Care Farms

“The ultimate goal of farming is not the growing of crops, but the cultivation and perfection of human beings.”

— Masanobu Fukuoka, *The One-Straw Revolution*

# What is a Care Farm?

**What is a Care Farm?:** "It is an increasingly well-established therapeutic intervention, embedding therapeutic processes within an agricultural landscape.

It draws on, incorporates, and benefits from connections to green, eco, and nature based-therapies, utilizing biotic and abiotic elements of nature to promote social, physical, mental, and emotional well-being"

Green Care in Agriculture: Health Effects, Economics  
and Policies  
Pages 13-24

## **Why is it beneficial?:**

Increased self-esteem

Improved social interaction

Enhanced confidence

Developing awareness of well-being

Working individually and as part of a team

Preventing deterioration in many conditions

Seeking paid employment or voluntary work

# Examples of Care Farms

*an Alaska Behavioral Health program*

## Growing Food, Supporting Youth

### Our Mission

Alaska Seeds of Change employs and empowers local youth, promoting self-reliance and community involvement, to grow and sell fresh produce.

"All of the farmers receive food business and agriculture training hosted by Set Up Shop and our partner agency, the Refugee Assistance and Immigration Services program at Catholic Social Services."

Notes

# Nonprofits

"Without the farmer, there is no food."  
— Lailah Gifty Akita

# What is a Nonprofit Farm?

**Nonprofit:** An organization that has a mission and purpose to aid in a social cause and provides public benefit.

A lot of Non-profits can also be considered Care Farms because their mission is about helping certain populations in the community.

**Examples:** Disconnected youth, refugees, school students, elders ect...

**How do you make a living as a nonprofit?:** Generally, nonprofit farms need to find ways to support their food production. This can look like getting help from the state, government, or funding sources who offer grants for agriculture/education/food security. Having something other than the product to bring people onto the farm with donations.

**Examples:** workshops, field trips, onsite therapists, or other added valued options helps to make the farms sustainable too.

## 2 Different IRS Write-Offs:

section 501(c)(3): Charitable Organizations

Section 501(c)(5): Agricultural Work

**Volunteers:** Nonprofit Farms share the load and experience with volunteers who support the mission of the farm or who are looking for hands-on experience.

**VOLUNTEERS**

# Examples of Nonprofit Farms

"Our Mission is to encourage local food production and environmental awareness through hands-on education in natural and farming ecosystems."

"Seed of Love is a 501 (c)(3) non-profit community care farm on the island of Molokai (Hawaii). We work with the land and community to create healing and educational opportunities for anyone who wishes to participate, with emphasis towards youth and community members with little or no financial means."

The Tyonek Community Garden is a garden space that helps the overall community. Elders first, community members, and their schools. The Community Garden helps teach their children how to work their land for nutrients.
